

Adam Field

Overview

Since leaving University I have been working as a Project Manager for a Digital Agency in London. It has been an invaluable experience and I have gained a good understanding of the project lifecycle. I have been involved in all aspects of the process, from the initial scoping, estimation and planning through to QA and deployment. I have worked on a variety of projects ranging from the creation of bespoke in-house tools, to managing the maintenance of a large global site. This has provided me with a solid foundation on which I hope to build.

During this time I have continued to improve my coding skills with a variety of side projects. These include scripts to help with the forecasting of budgets, a reporting system that utilises our ticketing API, as well as a personal event management tool called FishFish. I am keen to improve my knowledge in a more technical role and am looking forward to the creative and mental challenges that will accompany this change.

Oxford Aviation Training Sep 2005 - Sep 2007

Averaged 91% with First time pass in the CPL(IR) ME (Final Flight Test)

Interests and Achievements

I built an Aquaponic farm in my garden. This interest started with my dissertation and has become somewhat of an obsession. The system uses a Raspberry Pi and a range of sensors to monitor and control the shed in which it is housed.

I enjoy learning new skills, I have been expanding my knowledge in Python and the Django / Flask frameworks.

I am an avid reader of Wired magazine and various Tech related sites. I also have my PADI Divemaster and recently gained my RYA Powerboat License.
